* The programs listed have limited enrollment and/or continuous waitlists. The date a waitlist begins is indicated (unless a program has a continuous waitlist). The approximate wait for admission to a program will depend on the student's application completion date, district residency, and random selection. In addition, some programs require completion of pre-core courses and/or a deposit for admission to the program. For these reasons, the timing of admission to a program may not necessarily correlate to the student's position on the waitlist.

These programs require completion of pre-core courses prior to admission.

Δ These programs require the \$50 Advanced Reservation Fee

◇ Non-district residents cannot be considered for programs which have a close date prior to January 1 for fall and May 1 for spring term.
